

PERIPHYTON STORMWATER TREATMENT AREA 2

Client Name: *South Florida Water Management District / CH2M HILL (Prime)*
Type of Service: *Periphyton STA support services*

Milian, Swain & Associates, Inc. (MSA) provided field support services for work to be conducted at four 5-Acre Periphyton Stormwater Treatment Area (PSTA) field scale experimental cells, located west of STA 2 off State Road 7 in Palm Beach County.

The project involved weekly collection of water quality samples, including low-level total phosphorus and total nitrogen, and monthly collection of periphyton and plant samples. Ancillary monitoring activities included support labor for tracer testing (lithium), monthly monitoring well sampling, and sediment sample collection at the end of the study period.
